

PLAN FOR GROWTH

Dean Brady,
Founder-CEO
GranitePro LLC

An **ActionFlow**
Case Study

Overview:

Dean knew that for his company to grow he had to be proactive in recording processes and systems. He made the move to ActionFlow when he had 6 employees. By implementing ActionFlow's process automation features it forced themselves to look in the mirror and nail down their processes as they grew.

Now at 15 Employees they are at the point where he and his business partner are no longer part of the day to day operational process. They have even been able to take time off without fear of the wheels falling of the bus.

"We have an amazing team and ActionFlow is one of the tools they need to perform at their best".

GranitePro continues to thrive with ActionFlow and looks forward to a long future together!

GranitePro
